Starships D6 / Imperial Missile Platform

Name: Imperial Missile Platform
Affiliation: Galactic Empire, Coruscant Security Force, Imperial Navy
Type: Orbital Defence Platform
Scale: Starfighter
Skill: Starfighter Piloting
Skill: Starfighter Piloting 5D+2, Starship Gunnery 5D+1, Sensors 5D
Space: 1
Maneuverability: 1D
Hull: 2D
Sensors:
- Passive: 15/1D
- Scan: 25/2D
- Search: 45/3D

Weapons:
- 6 x Concussion Missile Launchers (24 Missile Magazine)
  - Fire Arc: Front
  - Space: 1/3/7
  - Atmosphere Range: 30-100/300/700m
  - Damage: 8D

Description: During the early reign of the Galactic Empire, the Coruscant Security Force identified Darth Vader's starship as a Separatist splinter cell. With Vader's starship having its communications jammed and thus not being able to transmit access codes to Coruscant's orbital defense, a missile platform launched several missiles, resulting in Vader crashing on Coruscant's surface. The incident was part of a conspiracy against Vader by several Imperial officers.
