Description: As the slowest fighter in the PVN, the Seth has earned itself a reputation as the Turtle of the Vasudan fleet. Even though it is quite compact in size, the Seth can carry a massive payload, and has a lot of shielding. Its standard impulse engines aren't very powerful, but the Seth gains an incredible speed boost when using its afterburners. The Seth is primarily used in convoy attacks and capital ship escort duties.

The GTA considers the PVF Seth to be a Class C threat.
