Description: The GTB Artemis is the most agile bomber in the GTVA fleet, which makes it ideal for quick-hitting missions against warships and other slow targets. Of the same technological generation as the Boanerges class, the Artemis is less heavily armed and carries a lighter weapon payload, but it is significantly more maneuverable. While the Boanerges can inflict more damage, the Artemis can undertake (and return from) missions the slower Boanerges would have no hope of surviving. All Artemis-class bombers in the GTVA fleet are currently serving with the 2nd and 3rd Battle Groups.
