Description: The GTSG Mjolnir is the most advanced sentry gun device known. Vastly tougher and deadlier than the earlier Watchdog, Cerberus, and Alastor models, the Mjolnir is a danger to any

hostile fighter or bomber that comes within range. Its two beam weapons and three missile banks enable it to take on multiple enemies simultaneously. Mjolnirs are also referred to as RBCs (remote beam cannons). They are used to help protect the most vital front-line Alliance installations.
