

Starships D6 / Sienar Fleet Systems Delta-class

Name: Sienar Fleet Systems Delta-class T-3c shuttle

Type: Shuttle/Transport

Scale: Starfighter

Length: 14.39 meters

Height/depth: 25.1 meters

Skill: Space Transports Piloting: Delta-class T-3c shuttle

Crew: 5; Skeleton: 1/+10

Crew Skill: Space Transports 5D, Starship Gunnery 5D,

Starship Shields 4D,

Astrogation 4D

Passengers: 20

Cargo Capacity: 40 metric tons

Consumables: 3 months

Cost: Not for sale to civilians

Hyperdrive Multiplier: x1

Hyperdrive Backup: na

Nav Computer: Yes

Maneuverability: 1D

Space: 7

Atmosphere: 350; 1050 kmh

Hull: 4D

Shields: 3D

Sensors:

Passive: 25/0D

Scan: 45/1D

Search: 85/2D

Focus: 3/3D

Equipment:

Stealth Optimisation: -1D to sensors to detect this vessel

HoloNet and Subspace antennae: for deep space communications

Multi-spectrum ranging laser: Instead of firing the shuttle can feed targeting information to allied vessels for a +1D to hit.

Weapons:

KX3 laser cannon (1)

Fire Arc: Front

Skill: Starship Gunnery

Fire Control: 2D

Space Range: 1-3/12/25

Atmosphere Range: 100-300/1.2/2.5 km

Damage: 3D

Twin laser cannons (2)

Fire Arc: Front

Skill: Starship Gunnery

Fire Control: 1D
Space Range: 1-3/12/25
Atmosphere Range: 100-300/1.2/2.5 km
Damage: 5D
Wingtip laser cannons (3)
Fire Arc: Front
Skill: Starship Gunnery
Fire Control: 1D
Space Range: 1-3/12/25
Atmosphere Range: 100-300/1.2/2.5 km
Damage: 4D

Description: The Delta-class T-3c shuttle also known as Delta-class shuttle was a type of shuttle used by the Galactic Empire shortly before the Battle of Yavin. Director Orson Krennic owned one such shuttle. It had a starkly geometric hull shape and folding bat-like wings.

The Delta-class T-3c shuttle was originally designed as a side project by Sienar Fleet Systems and was not intended for production. Director Orson Callan Krennic saw the concept design of the shuttle and became fascinated by its design, and Sienar decided to produce the shuttle. The ship was optimized for stealth, with a sloped hull and composite skin. The crew cabin was sparse, with simple crash seats and storage straps. The foldable lateral wings decreased the shuttle's footprint when on the ground. The wings contained HoloNet and Subspace antennae to maintain communications when in deep space. Laser cannons were attached to the bottom of the shuttle and on the tip of each of its three wings.
