

Creatures D6 / Convor

Name: Convor

Type: Bird

Dexterity: 4D+1

Perception: 4D+1

Strength: 1D+2

Special Abilities

Beak: Str +1D

Move: 23 (flying) 3 (walking)

Size: 0.2m long

Description: Convorees (singular: convor) were the yellow feathered birds native to Trandoshan moon Wasskah.

Convorees were small avians native to the brier forests on Wasskah. They had short bodies with round heads and large eyes. They had a long curled tail to grip tree branches as well. They used teamwork to defeat one of their predators, the momong, by dropping them off the limbs of trees.

They were remarkably similar in appearance to Kiro's birds, but with different colored plumage.

These creatures were commonly adopted as pets, such as in the case of Aedalus, Erial and Vector.
