Vehicles D6 / Aratech Repulsor Company C-P

Name: Aratech Repulsor Company C-PH patrol speeder bike
Type: Speeder Bike
Scale: Speeder
Length: 4.12 meters
Height: 1.37 meters
Skill: Repulsorlift operation: Speeder Bike
Crew: 1
Passengers: 0
Cargo Capacity: 20kg
Cover: 1/4
Altitude Range: Ground level-20m
Maneuverability: 3D
Move: 135; 400kmh
Body Strength: 4D
Equipment:
- Retractable illuminator lamp on an articulated mount

Weapons:
- Forward fixed BlasTech Industries Ax-25 blaster cannon
  - Fire Arc: Front
  - Skill: Vehicle Blasters
  - Fire Control: 1D
  - Range: 3-50/100/200
  - Damage: 5D

Description: The C-PH patrol speeder bike, also known as the Imperial patrol speeder or as the interceptor speeder bike, was a model of speeder bike used by patrol stormtroopers of the Galactic Empire in Coronet City on Corellia.

The speeder bike was designed to convey power over agility, although it possessed both due to its advanced built-in repulsorlift maneuverability systems. Its sturdy shape was capable of withstanding any high-speed collisions with other vehicles. In addition, it has onboard sophisticated electronics that alert the driver of any incoming traffic. Unlike other speeder bikes, the C-PH lacks the outrigger steering vanes, instead making use of a forward-facing bank of repulsorfield vector guides for maneuvering. Its main armament is a forward fixed BlasTech Industries Ax-25 blaster cannon. Other features included a retractable illuminator lamp on an articulated mount, control handle rail slots on the sides of the bike, rocker-pivoted foot pedals that control the speed and altitude, an acceleration pad with positive traction field near the seat, and the power cell access panel near the rear.
