Description: Tamara Ryvora, nicknamed "Tam," was a human female mechanic from Kuat who served as a member of Team Fireball on the Colossus, a refueling station in the Outer Rim Territories. She aspired to be a star racer, and saw repairing the derelict starship Fireball as a second chance at her goal, after having lost her first ship.

Tamara Ryvora was the daughter of a racer. Her father's career inspired her to become a racer herself, and she left her home planet of Kuat to pursue that dream. After falling on hard times while working her way up the circuit, Tam came to the Colossus station on Castilon sometime before 34 ABY. She became good friends with another racer, Hype Fazon. However, the friendship ended after Fazon earned a place in the Ace Squadron, reserved for the station's most elite pilots, and moved to Doza Tower. Ryvora's racing career was derailed when, in need of credits to repair her racer, she borrowed on the ship's value prior to a race, but lost the race and, consequently, her ship.

By 34 ABY, Ryvora was a member of Team Fireball, a racing team and group of mechanics led by Jarek Yeager, along with Neeku Vozo and R1-J5 "Bucket". Yeager had promised her the Fireball, an old racing ship, if she could fix it up.

Personality and traits

Ryvora was a human female with black hair, brown eyes and dark skin. She had a generally prickly and tough personality, not taking what she saw as criticism of her work or the Fireball well. However, after Kazuda Xiono came to the Colossus, she slowly became more empathetic and caring, shown when she risked her life to save Synara San during a pirate raid, during which the Colossus was virtually defenseless and all she had to rely on were her fists, wit, and BB-8.

Having never lived under the tyranny of the Galactic Empire, Ryvora failed to recognize their successor, the First Order, as a threat. Following their supposed rescue of Torra Doza, Ryvora quickly developed sympathy for the First Order and wholeheartedly believed they were earnest in their desire to protect the Colossus. Despite that sympathy faltering upon learning of the massacre on Tehar, Ryvora still supported the First Order's increasingly draconian measures. Just before the battle of Castilon, Ryvora's pliancy was exploited by Tierny, who regarded Kaz and Yeager as dangerous and untrusting of her enough to not tell her the truth about Kaz, and that this had put her life in danger. She believed this so much that, when faced with the decision of taking Yeager's hand and joining the Resistance, or taking Tierny's and joining the First Order, she put her faith in Tierny and joined the First Order.

Skills and abilities

Being a mechanic, Ryvora possessed extensive knowledge of engineering, so much so that despite Kaz being born into an opulent world with many opportunities, she doubted that he had any training as an engineer, and being able to put the decrepit racer Fireball back together. Her skill as an engineer also contributed to her great strength. She was easily strong enough to lift an acceleration compensator, which Kaz was forced to drag, and take down or knock out three pirates in hand-to-hand combat.
