Description: Elrik Vonreg was a human male First Order TIE Fighter Pilot. During the era of the New Republic, Vonreg held the military rank of major baron in the armed forces of the First Order. A skilled starfighter pilot, he fought a New Republic squadron of T-85 X-wing starfighters led by Kazuda Xiono as well as a Resistance T-70 X-wing starfighter piloted by Commander Poe Dameron.

Despite his efforts, however, Major Vonreg was forced to break off his attack and return to Starkiller Base where he reported to Captain Phasma. As a result, the New Republic managed to transfer intelligence to the Resistance, and as such discovered that the First Order was operating in secret on the Outer Rim planet of Castilon. The Resistance dispatched a spy, the newly recruited Kazuda Xiono, to investigate. Vonreg was killed by Xiono during the Battle of Castilon when he was shot down.
