Starships D6 / Dragon-bird robot drone

Name: Dragon-bird robot drone
Class: Drone
Scale: Speeder
Skill: Starfighter Piloting - Drone
Crew: 0
Drone Skill: Starfighter Piloting 4D+2, Sensors 3D+2
Consumables: 1 Day
Cargo Capacity: 5 Kg
Hyperdrive Multiplier: No
Hyperdrive Backup: No
Nav Computer: None
Space: 6
Atmosphere: 375;1,050kmh
Maneuverability: 2D
Hull: 4D
Shields: None
Sensors:
- Passive: 20/1D
- Search: 40/2D

Weapons:

Description: Dragon-bird robot drones were flying droids that were fashioned after the dragon-birds that were native to Onderon. They were used for target practice by Jedi starfighter pilots on Ossus.
