

Vehicles D6 / JAK Racing J930 Dash-8 Podracer

Name: JAK Racing J930 Dash-8 Podracer
Manufacturer: JAK Racing
Class: Repulsorcraft
Length: Engines: 9.55 meters
Crew: 1 pilot
Passengers: None
Skill: Repulsorlift operation: Podracer
Crew: 1
Crew Skill: See Ebe E. Endocott
Cargo Capacity: 6 kilograms
Cover: 3/4
Altitude Range: Ground - 45 meters
Manoeuvrability: 2D+2
Move: 250; 750 kph
Body: 3D

Description: The J930 Dash-8 engine was a Podracer engine produced by JAK Racing prior to the Invasion of Naboo. The Triffian Podracer pilot Ebe E. Endocott utilized blue J930 Dash-8 engines in the Boonta Eve Classic won by Anakin Skywalker during the year 32 BBY. Later during 22 BBY, the Devliikk competitor Raido used the engines during the Mon Gazza Maze event on the planet of Mon Gazza. His Podracer was destroyed, however, when he rammed another competitor from behind.

Characteristics

The J930 Dash-8 was a solid model of podracer. Great traction and turning, balanced acceleration and top speed, with a nice cooling and repair mechanism. While the breaks were not so good and the pod itself was still on the slow side, Ebe E. Endocott was skilled enough with it to win three consecutive championships on Malastare, place 4th in the Boonta Eve Classic of 32 BBY and was the crowd favorite at the popular Fire Mountain Rally race course on Baroonda.
