

Vehicles D6 / Elsinore-Cordova Engineering

Name: Elsinore-Cordova Engineering TurboDyne 99-U Podracer
Racer
Manufacturer: Elsinore-Cordova Engineering
Model: TurboDyne 99-U
Length: Engines: 5.03 meters
Scale: Speeder
Skill: Repulsorlift operation: Podracer
Crew: 1
Crew Skill: See Wan Sandage.
Cargo Capacity: 3 kilograms
Cover: 3/4
Altitude Range: Ground - 40 meters
Manoeuvrability: 3D+1
Move: 255; 765kph
Body: 2D+1

Description: The TurboDyne 99-U engine was a Podracer engine produced by Elsinore-Cordova Engineering prior to the Invasion of Naboo. It was piloted by Wan Sandage.

Characteristics

The TurboDune 99-U was a surprisingly maneuverable Podracer considering it's size. Boasting strong acceleration, traction and airbrakes it could handle winding courses well. It also had a good boost package to compensate for it's slightly lacking top speed. Though it's repair mechanism left something to be desired.
