

## Vehicles D6 / Rothana Heavy Engineering F-143

Name: Rothana Heavy Engineering F-143 emergency speeder

Manufacturer: Rothana Heavy Engineering

Model: F-143 emergency speeder

Type: Air Speeder

Scale: Walker

Length: 36 meters

Skill: Repulsorlift operation: Air Speeder

Crew: 2, 1 Captain, 1 Co-Pilot

Passengers: 20

Cargo Capacity: 500 Kg

Cover: Full

Altitude Range: Ground level-3km

Maneuverability: 1D

Move: 375; 1,100 kph

Body Strength: 4D

Weapons:

- 4 Sprayers

  - Fire Arc: Turret

  - Scale: Walker

  - Skill: Vehicle Blasters

  - Fire Control: 2D

  - Range: 2-50/100/200

  - Damage: 6D (Fire Suppression Foam)

- 1 Tractor Beam Projector

  - Fire Arc: Turret

  - Scale: Starfighter

  - Skill: Vehicle Blasters

  - Fire Control: 3D

  - Range: 2-100/200/500

  - Damage: 4D

Description: The F-143 emergency speeder, also known as a F-143 firefighting speeder, Coruscant fire suppression ship, emergency firespeeder, emergency fire suppression speeder, firespeeder, or fireship (also phrased fire ship), was a model of speeder utilized for fire suppression.

### *Details*

The F-143 emergency speeder was a fire suppression ship manufactured by Rothana Heavy Engineering. Designed to provide essential disaster relief, these speeders carried several fire-retardant agents including tanks of water and foam on the ship's undercarriage. These fire-fighting solutions were released through pressurized dousers mounted to the vehicle's four wingtips.

A tractor beam projector was fitted below the heat-resistant cockpit to shift debris during emergencies. The interior was equipped with a medical bay where crewmembers could treat

serious injuries quickly, and the exterior featured flashing emergency lights.

The ship was equipped with water spray, foam spray, fire retardant and agents.

### *History*

Several fireships were mobilized in an attempt to put out the flaming wreck of the Invisible Hand as it crash-landed on Coruscant, at the conclusion of the Battle of Coruscant. Fire crews followed the wreck down to an airstrip landing, dousing flames on the hull with their dousers.

The Royal House of Naboo also maintained fire teams, who were mobilized during the Imperial Operation: Cinder following the Battle of Endor. The teams' dousers were brought to bear on the fires caused by typhoon-strength storms.
