

Starships D6 / The Independence and Home One

The Independence and Home One

The flagship of the Alliance, the Home One, was the largest warship in the fleet.

Twice the size of the Imperial Star Destroyer, Home One was a massive vessel from which Admiral Ackbar himself commanded the Rebel fleet and personally led the assault against the second Death Star.

Despite its enormous form, the Home One wasn't outfitted for direct ship-to-ship combat. In fact, it was highly underarmed for its size and class, wielding only twenty-nine turbolaser batteries and thirty-six ion cannon batteries. Instead, Home One carried an impressive amount of starfighters, 120 in all, which was nearly twice the amount that the standard star destroyer had to offer.

Extensive shielding and armor allowed the Home One to take a beating for prolonged periods of time, if the situation called for it. Advanced communications, sensors, holo displays and tactical computers made it ideal for a command ship.

The Home One and the Independence quietly faded away during the days of the New Republic, they were retired secretly and their whereabouts after that point were kept highly classified. No official explanation about the Independence and the Home One being the same vessel or not was ever given, but they were never recorded together.
