Move: 5

Description: R2-A5, also known as Ayfive, was a R2 series astromech droid with green and white plating and masculine programming. In 0 BBY, it spent time causing trouble in the spaceport of Mos Eisley on the planet Tatooine.

Biography

In 0 BBY, R2-A5 was rolling around the spaceport of Mos Eisley on the planet Tatooine and getting into trouble when the local moisture farmer Luke Skywalker was stopped by a group of stormtroopers while in his X-34 landspeeder.

Characteristics

R2-A5 was a R2 series astromech droid with masculine-programming, white and green plating, and a black sensor. Like all R2 astromech droids he was manufactured by Industrial Automaton and stood 93 centimeters tall. R2-A5 was programmed for combat communications was used mainly to acquire targeting data for starfighters and gunnery systems. He was a tough-guy and ready for action at the drop of a hat. He was equipped with a claw arm hidden within his torso and a retractable sensorscope within his dome.
