Description: Fern and KB's hoverbike was a modified two-being hoverbike owned by the human Fern and her friend KB on the planet At Attin during the New Republic Era.

Characteristics

The hoverbike started as simple two-being speeder owned by the human Fern and her friend KB on the planet At Attin during the New Republic Era. The pair modified the speeder with a more powerful engine. It was 1.64 meters long, 1.12 meters wide, 0.84 meters high with a side seat.

History

Around 9 ABY, the day before the Career Assessment Test, Fern and KB rode to school on the bike, taking a short cut through the forest. After school while taking a jump out of a tunnel the speeder scraped the ground and eventually came to a stop. After getting it back to KB's home, KB noticed that the power converter was burnt out and they needed a replacement.
